**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 13 August 2009.

## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species:
  - a. Species I, the embodiment represented by Figure 3; directed to an embodiment of a method for detecting a locked axle condition in a vehicle per applicant's disclosure.
  - b. Species II, the embodiment represented by Figure 4; directed to an alternative embodiment of a method for detecting a locked axle condition in a vehicle per applicant's disclosure.
  - c. Species III, the embodiment represented by Figure 5; directed to a further alternative embodiment of a method for detecting a locked axle condition in a vehicle per applicant's disclosure.
  - d. Species IV, directed to an embodiment of a further alternative method for detecting a locked axle condition in a vehicle per applicant's disclosure.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. The species are independent or distinct because they are mutually exclusive as indicated per the disclosure.

In this instant case, the invention in each embodiment modified per applicant's disclosure should be operated independently and distinctly without one another. For example, the method

for detecting a locked axle condition in a vehicle represented by Figure 3, Species I, does not necessarily need or require the method for detecting a locked axle condition in vehicle represented in Figure 4, Species II, the alternative embodiment, or vice versa and therefore are mutually exclusive to each other.

Further, because these inventions are independent or distinct for the reason given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different status, restriction for examination purpose as indicate is proper

2. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

3. Due to the complex technical nature of the Election Requirement, this Species Requirement is presented via written communication.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and

specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 (a) of the other invention.
